Adaptable and comprehensive school management

Nurturing student learning progress, development and wellbeing.

SENTRAL

Meeting the requirements of Victoria's education landscape

From high teacher workload to accommodating state curriculum requirements for communicating and demonstrating student learning progress, Victorian schools must navigate through a diverse education landscape.

Victorian schools require a teacher-friendly school management system, improved methods for conveying student learning progress, more effective ways to manage student wellbeing and more efficient ways to communicate with parents and guardians. In addition, schools need solutions that foster collaboration between school roles and functions. These challenges underscore the need for comprehensive, streamlined solutions that alleviate administrative burdens, boost school efficiency, and foster an environment conducive to both educators and students.

Helping Victoria's educators nurture student learning progress, development and wellbeing.

Sentral, designed with educators in mind, offers a practical solution to Victoria's school requirements. Its flexible, collaborative modules streamline school processes, allowing customisation to fit any school's unique needs. Sentral provides a continuum tracker so you can monitor learning against a continuum, and see a longitudinal view of student progress. This empowers teachers to make informed decisions leading to enhanced student instruction and intervention strategies. Sentral makes it easy to engage and communicate with parents and guardians with the Sentral for Parents Portal and App. Furthermore, Sentral simplifies student wellbeing management, helping schools create a better environment for both educators and students.

Trusted by hundreds of schools Victoria-wide

Continuum view of student learning progressions

Educators can easily track individual student and cohort learning progress against a continuum, empowering educators to make informed decisions and drive improved student outcomes.

Holistic management of student wellbeing

Complete and detailed view of student interactions, achievements, struggles, and successes. Tracked across modules to provide a comprehensive view to nurture student wellbeing.

Hyper configurable

Tailor workflows and settings to match the unique needs of your school, providing flexibility and adaptability.

Educator-centric design

Developed by teachers for teachers, Sentral understands the specific requirements and challenges of the education community.

Adaptable and collaborative school management

Sentral modules promote school efficiency. Enhancing collaboration and performance through seamless data flow between modules (attendance, academic reports, and wellbeing).

Strong integrations and partnerships

Credibility, reputation, and vision

Sentral partners with best-in-class Ed-tech providers to offer integration solutions that best address each school's specific requirements. From class creation to learning management systems and timetabling, Sentral offers schools the ability to use their existing software ecosystem or work seamlessly with many popular Australian school applications to ensure scalability and growth to meet whatever the future throws at them.

Sentral offers a suite of integration solutions ranging from:

- Calendar Management
- Class Creation
- Compliance
- Cyber Security
- Educational Resources
- Library
- Printing

- Kiosk, Boarding, and Safety
- Learning Management
- School Organisation System
- School Photographs
- Timetabling
- Wellbeing

Some of our partners and integrations include:

A modular approach for adaptable school management

Sentral modules are designed to be highly configurable, scalable, and adaptable to help school staff in varying roles perform their function efficiently.

- Related modules are grouped, allowing like-tasks to be performed in one location.
- Sentral allows information and data to flow across modules allowing a seamless view of student information.
- Schools can tailor workflows and settings to match their unique needs allowing the school to scale and grow.

Continuum Tracker

An efficient and customisable solution for tracking student and cohort learning progress and development.

Monitor student progression against a continuum and observe student progress along a longitudinal view, gain valuable insight and provide personalised student instruction to foster improved student outcomes.

Seamless curriculum alignment

Adapt to standard VCAA subjects or custom areas and align educational goals and benchmarks for precise tracking.

Streamlined reporting process

Generate student progression scores to help teachers make judgements about student development.

Insightful data storytelling

Visualise student achievements and struggles, enabling informed decisions for targeted interventions.

Holistic student assessment

Observe the evolution of core skills over time and gain a comprehensive view of each student's growth and potential.

Empowering teachers, engaging parents

Foster proactive parent engagement, promoting a collaborative approach to student development and success.

Administration

Modules to ensure streamlined back-office operations.

Sentral Administration provides easy oversight of your school's critical functions. Manage student information, infrastructure, and resource allocation from a centralised system that focuses on streamlined operations. The Sentral platform also allows you to handle variations to your school's routine efficiently, ensuring smooth daily operations.

Households
Easily oversee complete household information including family members and primary and emergency contacts. Manage complex family structures and ensure appropriate communication.

Student Profiles
Centralised access to student profiles provides a comprehensive view of student data.

Health
Create detailed records of student health requirements, medication management, and individual health care plans. Efficient management of sick bay / health centre records.

Variations
Handle operational variations when staff are absent or conditions change including classes, activities, and events. Offering a more efficient method for daily organisation, allocating resources, and maintaining supervision compliance requirements.

Asset Manager
Create asset registers for more efficient oversight of resources and equipment.

Activities
Plan, approve, and manage all aspects of school excursions and co-curricular events. Work collaboratively with departments within the school to ensure that activities run smoothly with your school's overall schedule of events.

Timetables
Timetable viewer is linked to external third-party timetable creation software.

Calendars
Complete internal and external calendar functionality.

Assessment & Reporting

Integrated tools that ensure quality reporting and comply with state education regulatory requirements.

Assessment and reporting are an essential part of quality teaching and learning. As a fully integrated system, assessment data can be fed directly into academic reports saving the burden of double entry and ensuring data integrity.

Access state-based curriculum outcomes and learning progressions for reporting to accurately track student and cohort progress in compliance with regulatory requirements.

Academic Reports
Integrated reporting system that can draw directly from other modules within Sentral, including academic results, participation records, attendance, and more.

Markbook
Record assessment data that feeds directly to academic reports. Create markbooks by class or faculty.

Continuum
Track student and cohort progress following state-based learning progressions or custom progressions developed by your school.

Continuous Assessment
Provide regular progress and achievement feedback to students and parents.

Curriculum Integration
Built-in state and national curriculum outcomes for streamlined mapping against assessment and learning tasks.

Attendance

Manage student attendance and onsite visitors efficiently.

Accurately recording student attendance is a fundamental part of a school's duty of care. With the option of lesson by lesson, or set time of day, Sentral Attendance works with your school's preferences.

School Attendance
Manage all aspects of student attendance either at the beginning of the day or lesson by lesson.
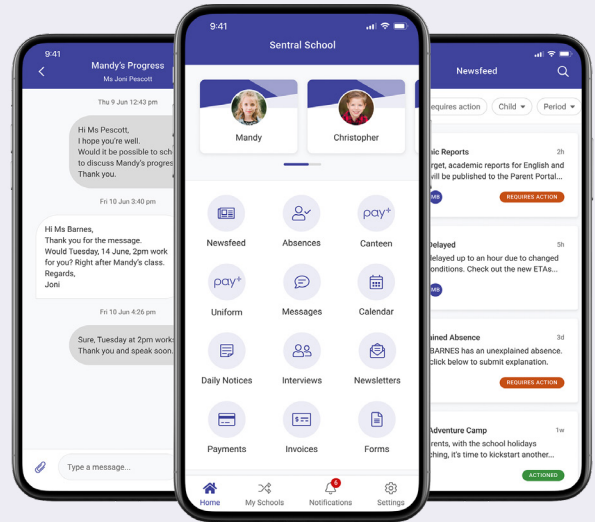

Kiosk – Visitors
Manage and track visitors and contractors efficiently through strategically placed kiosks. Flexibility to use Sentral's recommended hardware or bring your own.

Kiosk – Flexible student attendance
Flexible attendance for senior students via swipe in/out.

Messaging
Direct messaging via SMS, email and portal notification allows your school to provide real-time updates to parents on student attendance, providing peace of mind.

Wellbeing

Record student interactions and achievements to improve the management of their wellbeing.

Student wellbeing is a major contributor to a child's capacity to learn, achieve and develop holistically as a person. Sentral Wellbeing is highly configurable to your school's needs. It provides both a broad overview and in-depth detail of student interactions, achievements, struggles, and successes.

With modules designed around the actual experiences that students are likely to encounter, Sentral enables the complementary human connection in managing student wellbeing.

Wellbeing
Record student behaviour and interactions to improve monitoring and positive wellbeing outcomes.

Plans
Design and create individual student learning plans to address specific needs and achieve outcomes-based learning goals.

Awards
Create and keep track of awards with the ability to use automated tiered systems and levels. Create automatic award notifications and generate reports that help to inform policy and practice.

House Points
Automatically or manually award points based on activities, achievements or awards.

Parent Portal & Mobile App

Allow parents to connect with your school and keep track of their child's progress.

In a highly interconnected world, Sentral recognises the need to remotely manage school life in a secure environment. The Sentral Parent Portal allows parents to handle simple matters of administration and to connect directly with teachers.

For networks of schools and campuses, parents can access portal information on a single app.

Messaging
Improve communication with electronic messaging and push notifications.

Parent Interviews
Easily book parent interviews online.

Payment Gateway
Receive and record payments for school events or fees. Increase payment response rates from parents.

Security and Privacy
Secure connection to maintain privacy and handling of personal information and transactions.

Mobile App
Parents can stay in touch on the go with the mobile app for iOS and Android. See key information including attendance, academic reports, and markbook results.

- **Manage all children in one app**
  Parents can view and manage all their children's education progression in other Sentral schools (High Schools & Primary Schools) on one platform and app.

- **Push notifications**
  Parents can receive push notifications about everything important and relevant to their child's education.

- **Track homework**
  Parents will be able to know exactly what work their child needs to complete at home and when.

- **Provide carer consent instantly**
  Parents no longer have to sign permission notes for their child for carrying back. Parents will be able to provide permissions instantly on their parent app.

Support when you need it

Access to Sentral's Help Centre help.sentral.com.au for an extensive library of helpful resources, comprehensive platform guides, and video tutorials.

For additional support schools also have the option to reach out to our support team by lodging a ticket via www.sentral.com.au/support.
